

**InPlasTwin-MINAGRIS webinar**  
**“From Research to Policy for Healthier Agricultural Soils”**

Date: 01-09-2026  
Time: 10:00–11:30 CET  
Duration: 90 minutes

**Agenda**

| Time (CET)  | Speaker                                                                                                         | Presentation                                                                                                                             |
|-------------|-----------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| 10:00–10:05 | Gordana Racić<br>(Future Systems Hub)                                                                           | Welcome and Opening Remarks<br>Introduction to the webinar objectives and the collaboration between the InPlasTwin and MINAGRIS projects |
| 10:05–10:10 | Janja Vidmar<br>(Jožef Stefan Institute)                                                                        | Introducing the InPlasTwin Project                                                                                                       |
| 10:10–10:15 | Ildikó Heim (FiBL)                                                                                              | Introducing the MINAGRIS Project                                                                                                         |
| 10:15–10:40 | Nanna Bloch<br>Hartmann, Professor,<br>DTU<br>Sevil Vafadar Afshar,<br>PhD, Postdoc, DTU<br>Nhu Phan, PhD, VITO | Biodegradable Plastics in Agricultural Soils: Key Research Results on Degradation, Extraction and Policy Implications                    |
| 10:40–11:00 | Ildikó Heim ( FiBL)                                                                                             | Sustainability Assessment and Policy Recommendations to Mitigate the Impacts of Agricultural Plastics                                    |
| 11:00–11:15 | Mia Guggiari<br>Dworatzek (AGES)                                                                                | The SoilPlastic App: Engaging Citizens in Soil Plastic Data Collection                                                                   |
| 11:15–11:25 | Q&A                                                                                                             | <i>From Scientific Evidence to Policy Action: What Is Needed to Improve the Sustainable Management of Agricultural Plastics?</i>         |
| 11:25–11:30 | Gordana Racić (FSH)                                                                                             | Closing Remarks and Future Collaboration Opportunities                                                                                   |
